

920

Assembled roving for panel

Product description

920 is a general-purpose panel roving known for excellent choppability and dispersion, low static electricity, and fast wet-out. It is mainly suitable for reinforcing unsaturated polyester resins and acrylic resins, and can be used in producing general-purpose transparent, translucent, and opaque FRP panels.

Product features

Item	Linear density variation	Moisture content	Sizing content	Stiffness
Unit	μm	%	%	(mm)
Test method	ISO 1889	ISO 3344	ISO 1887	ISO 3341
Standard range	± 5	≤0.15	0.35~0.65	120±20

Technical Parameters

1. Good choppability.
2. Good dispersion.
3. Good resin refractive match and with resins and extremely fast wet-out.
4. Excellent mechanical properties of parts.
